

1.

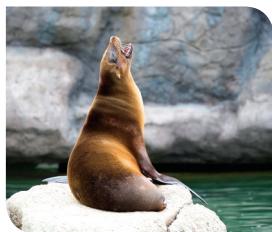

Pamela

Many people think that this wild animal is dangerous because they sometimes attack people. They live in the sea and oceans.

Which option shows the animal Pamela is talking about?

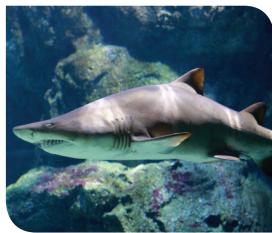

A)

B)

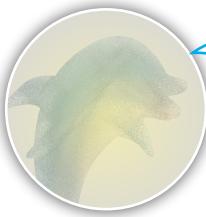

C)

D)

3.

I'm a mammal, and I love people. I live in the oceans and I can swim very fast. I'm friendly and really intelligent.

Which option shows the animal above?

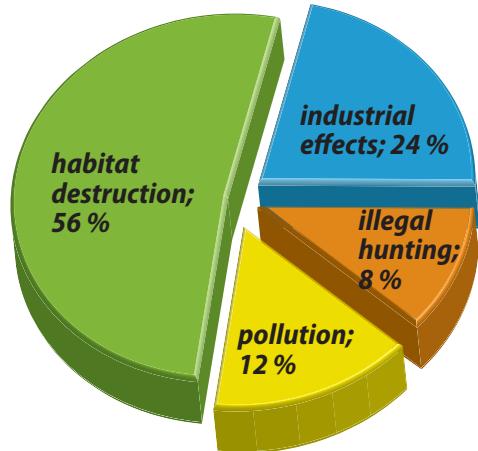

A) Dolphin

B) Rhino

C) Octopus

D) Crocodile

4. Polar bears are in danger because of:

According to the information above, people ----.

- A) should protect the habitat of Polar Bears
- B) should hunt Polar Bears illegally
- C) shouldn't keep the environment clean
- D) shouldn't stop the industrial developments

2.

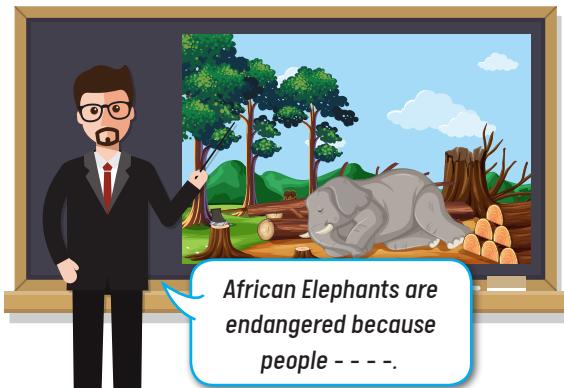

Giraffes

Size	: Up to 6 m.
Weight	: Up to 800 kg.
Habitat	: On grasslands in Africa
Kind	: Wild, Herbivores
Diet	: Leaves, seeds, fruit

Which option is CORRECT according to the information above?

- A) Giraffes are not very big animals.
- B) People can see giraffes in Africa.
- C) Giraffes are domestic animals; you can have them as a pet.
- D) Giraffes are carnivorous; they eat small animals like rabbits and rats.

5.

African Elephants are endangered because people ----.

Which option completes the sentence above?

- A) save their natural habitat
- B) plant trees
- C) take precautions
- D) destroy their natural habitat

6.

Kelly : Look at this animal, Janice. Do you know anything about it?

Janice : Yes, I do. This is Quagga. The last Quagga died in 1883.

Kelly : ----.

Janice : Because people hunted them for their skin and meat.

Which option completes the dialog above?

- A) Do they live in the forest
- B) Why did they become extinct
- C) When did they become extinct
- D) Are they extinct

7.

Terry : Hey, Rose, look at that animal. It's very big.

Rose : Yes, it is. It has a very big mouth and sharp teeth. It's called crocodile.

Terry : They look like dinosaurs. ----?

Rose : No, they aren't, but they are endangered because people kill them for their skin

Steven : Yes, I do. They lived in the United States about 200 years ago. But, they all died because people used their meat as cheap food.

Which option best completes the dialog above?

- A) Do Passenger Pigeons lay eggs
- B) What are the parts of Passenger Pigeons
- C) Which animals are endangered
- D) Do you know anything about Passenger Pigeons

Answer the questions according to the text below.

Mountain gorillas live in jungles in the mountains of Central Africa. They are about 150 cm long and weigh up to 200 kilograms. They have got thick black fur. They are herbivorous animals, so they only eat bamboo and fruit. They don't eat other animals. Mountain Gorillas are endangered and there are only about 800 of them because people destroy their natural habitats. Hunters also kill them illegally.

9. Mountain gorillas are in danger because ----.

- A) they don't eat other animals
- B) people harm their habitats
- C) they only eat bamboo and fruit
- D) they kill people and other animals

10. What kind of animals are mountain gorillas?

- A) They are herbivorous animals.
- B) They are endangered animals.
- C) They are about 1.5 meters.
- D) They are about 200 kilograms.

1.

Michelle

I want to join a fancy dress party.
I will wear an animal costume, but
I can't decide which one to wear.
I want to look like a herbivore
mammal. It has got long strong
legs and a pocket in front of its
body. It can jump high and can
carry its baby in its pocket.

Which of the costumes can Michelle wear?

A)

B)

C)

D)

4.

The Tasmanian Wolf is an extinct animal. It was like a dog with a long tail. It measured up to 150 cm with its tail and weighed up to 25 kilograms. It had brown stripes on its fur. They lived in Australia and New Guinea 2000 years ago and in Tasmania only 80 years ago. Its preys were kangaroos, birds and small animals. Tasmanian Wolf became extinct because people killed them. A farmer in Tasmania killed the last wolf in 1930.

Which of the following questions does NOT have an answer according to the information?

- A) What was the Tasmanian Wolf's population?
- B) Where did Tasmanian Wolves live?
- C) Why did the Tasmanian Wolf extinct?
- D) What did Tasmanian Wolves eat?

2. Imagine you are at Social Science class and want to learn more about deers.

Which of the following questions can you NOT ask your teacher?

- A) Where do deers live?
- B) What should we do to protect deers?
- C) Are deers endangered?
- D) Do deers lay eggs or are they mammals?

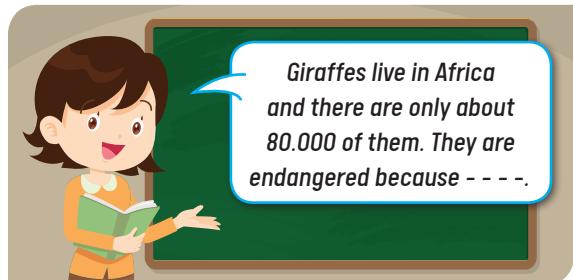

3. **Laura :** -----?

Sharon : We should keep the environment clean and stop global warming.

Which option completes the dialog above?

- A) Shouldn't we stop hunting animals
- B) Why should we stop global warming
- C) Should we protect the wildlife
- D) What should we do to protect wildlife

5.

Which option completes the sentence above?

- A) *they only sleep two hours a day on their feet*
- B) *they live in the cages at the zoos*
- C) *people hunt them for their meat, skin and tail.*
- D) *their necks are tall, so they can't climb trees*

6.

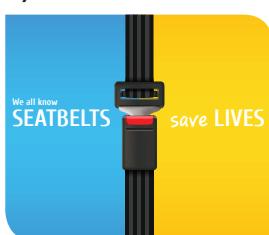

Which of the following slogans is NOT suitable for the board above?

A)

B)

C)

D)

7.

Alice : Hey Phillip. Can you help me for my homework. It's about Polar Bears.

Phillip : Sure.

Alice : ----?

Phillip : They eat seals, birds and fish.

Alice : ----?

Phillip : You can see them in the polar regions.

Alice : ----?

Phillip : Yes, unfortunately they are.

Which question can NOT Alice ask Phillip?

- A) What do they eat
- B) Where do they live
- C) Are they endangered species
- D) Can they survive in hot climates

Peter : Hey, Emily. Are there any Dodo birds in the world?

Emily : No, there aren't any. They all became extinct in 1662. People killed them all.

Peter : ----?

Emily : Scientists don't know, but they were easy preys for humans because they couldn't fly.

Which option completes the conversation above?

- A) Where did they live
- B) Why did people kill them
- C) When did they all become extinct
- D) How many of them were there in the 1600s

Answer the questions according to the text below.

Anatolian leopards live in the Mediterranean coast of Turkey. They look like a tiger or a lion with orange and black color. They weigh up to 60 kilograms and measure up to 2 meters. An Anatolian Leopard can eat many animals because they are carnivorous. Their preys are reptiles, birds, deer, goats, wild pigs, mice and even fish. They don't eat grass, leaves or fruit. They can run and attack its prey very fast because their legs are short. They can also climb trees very fast. Only about 15 Anatolian Leopards live in Turkey because humans destroy their natural habitat.

9. Anatolian leopards ----.

- A) aren't herbivorous
- B) are a kind of reptiles
- C) are extinct
- D) are slow runners

10. Which question does NOT have an answer in the text?

- A) Are they in danger?
- B) Can they climb trees?
- C) What should we do to stop their extinction?
- D) Why are they endangered?

1. Mary and Linda are talking about a wild animal.

Mary : Is this animal herbivorous?

Linda : No, it isn't. It's a carnivorous reptile. It eats lizards, frogs, birds and eggs.

Mary : What are the parts of its body?

Linda : It doesn't have any legs, so it can only crawl.

Mary : Do they lay eggs?

Linda : Yes, they do.

Which option shows the animal they are talking about?

A)

B)

C)

D)

3. Which option is NOT suitable for the stairs?

Animal Extinction

- A) Planting Trees
- B) Global Warming
- C) Illegal Hunting
- D) Destroying Natural Habitats

4. Which option is NOT suitable for the natural habitat snake?

We shouldn't...

- A) wear fur
- B) protect wild life
- C) cut down trees
- D) waste energy

2. Which of the pair below is NOT correct?

A)

orangutan

B)

deer

C)

fox

D)

whale

5.

Markhors are a kind of wild goat. They live in the mountains of Pakistan, Tajikistan and Uzbekistan. They have long horns and weigh up to 110 kg. They measure up to 2 meters. Markhors are endangered because people hunt them. There are about 2500 markhors in the world.

Which pair is NOT correct according to the information above?

- | | | |
|------------|---|-------------|
| A) size | → | 2 meters |
| B) weight | → | 110 kg |
| C) habitat | → | lakes |
| D) kind | → | herbivorous |

6.

Kevin : Do you know anything about extinct animals?

Terry : Yes, I do. Many animals are extinct now.

Kevin : ----?

Terry : For example, Mammoths and Tasmanian Wolves are now extinct.

Kevin : ----?

Terry : Because of humans. Some people harm wild animals.

Kevin : ----?

Terry : We should stop hunting animals.

Which question can NOT Kevin ask Terry?

- A) When did these animals become extinct
- B) Which animals are now extinct
- C) Why did they become extinct
- D) What should we do to protect wildlife

7.

Paul : Look! Isn't that a squirrel?

Eric : Yes, it is. Wow. He can climb a tree.

Julia : ----?

Sara : Yes, they do. They can run fast with their long strong legs and sharp claws.

Which option completes the dialog above?

- A) Do squirrels live in the jungle
- B) Do squirrels run fast
- C) How fast do squirrels run
- D) What do squirrels eat

8.

Amy : Do polar bears live in the dessert?

Lisa : ----.

Which option completes the dialog above?

- A) No, they didn't. They survived the Ice Age.
- B) Yes, they can. They can swim very fast.
- C) Yes, they do. They like very hot climates.
- D) No, they don't. They live in the polar regions.

Answer the questions according to the text below.

Mammoths were like a modern African elephant. They were enormous wild animals. They measured up to 4 meters and weighed up to 12 tonnes. They had two tusks to eat food like trees, grass and leaves. They were herbivorous. Their fur was very thick with fat inside, so they could survive in the Ice Age. Mammoths lived in Asia, Europe and North America. The first mammoths lived 5 million years ago, and the last mammoth died 4500 years ago. They became extinct because their food disappeared after the climate change. Scientists also believe that humans hunted them for food.

9. What do Mammoths look like?

- A) They look like big lizards but with long legs.
- B) They had four short legs and big ears.
- C) They look like modern African Elephants.
- D) They had thin dark skin.

10. Mammoths became extinct----.

- A) because of climate change
- B) 5 million years ago
- C) because of the Ice Age
- D) because they were enormous
